PROFILE

While my early exposure to programming was in high school, my early adulthood was spent serving my country as a Combat Medic. Re-entering civilian life has given me the opportunity to pursue my passion for coding, learning and the opportunity to create magic with others.

PROJECTS

BOOKISH

I am a Bibliophile, I love books. Bookish is an expression of that love coupled with my desire for efficiency. Why spend time organizing a physical medium when I could simply organize it digitally. That's what my application does, it creates digital bookshelves and allows a user to create personal volumes or books and search for books with the Google Books API and then store those on their shelves.

Technologies Used: Figma, React, Javascript, dbdiagram, GoogleBooks API
<https://github.com/Belljeremiah/frontEndCapstoneBookish>

ELEPHANT ROOM

Communication is the core of human experience. I built E.R. because I wanted to help facilitate a dialogue about the things we so often fail to communicate clearly or well. Some issues are big and you can talk about them more easily with the Elephant Room. Users can store supporting material for their beliefs.

Technologies Used: Django, Python, Tachyon, Figma
<https://github.com/Belljeremiah/python-django-Elephant-Room-Capstone>

HACKATHON - COMMUNITY PROJECT

Goal: Build game using Phaser and Firebase API . **Contribution:** Utilized canvas element in JavaScript to place text on image of winner once game conditions met

EDUCATION

Nashville Software School

AWARDS

Selfless Service Coin John M. McHugh 21st Secretary of the Army and Meritorious Service Award OIF OEF
Awarded in Hashemite Kingdom of Jordan

Environmental Health and Safety Award
Constellium-UACJ 2017

EXPERIENCE

NASHVILLE SOFTWARE SCHOOL

September 30, 2019 - March 27, 2020

- Six month coding apprenticeship
- Worked in a team environment to accomplish goals in a timely manner
- Gained experience using React, JavaScript, Restful API's, Python, Django
- Worked with other team members to display content, collate data, and manipulate that data for users and to allow users to manipulate as well
- Managed learning within time constraints and built several web applications in teams to display Nashville specific locations, created a digital arboretum and so many more
- Consumed Google-Books API for capstone project Bookish and manipulated resources to grow functionality and multiply User interaction with the material.
- Utilized testing strategies for writing more stable applications in Bangazon-llc Project final sprint.
- Experienced SQL queries of advanced joins and manipulated Table-Plus to display data in a variety of arrangements with final SQL project Chinook at Nashville Software School.

CONSTELLIUM-UACJ - QUALITY TECHNICIAN

August 2017 - June 2018

- Started as on-site EMT and security officer and promoted to quality technician
- Created test samples from raw material to fit Japanese, German, or American automotive standards for body sheeting using sample sets per country requirements as well as using industrial standards
- Pioneered speed cutting methods for test sample preparation
- Identified wasted material of red bin system and revamped company methods to eliminate lost material
- Worked in tandem with other teams to coordinate seamless production of results and enforce startup reliability
- Trained new hires on company procedures and lab policies

MISCELLANEOUS EMPLOYMENT

August 2016 - September 2019

- Cattleman at Glasgow Stock Yard August 2016 - January 2017
- Labor and contracting for Botts' Construction August 2016 - August 2017
- Served customers as an LNP representative at AFNI February 2018 - July 2019

DCI BIOLOGICALS - MEDICAL SUPERVISOR

January 2014 - August 2016

- Coordinated and monitored teams of phlebotomist's during procedures
- Responded to patient emergencies and reactions during treatments to ensure safety and care.

UNITED STATES ARMY KENTUCKY NATIONAL GUARD

Combat Medic | Aug 2008 - Aug 2014

- Trained in emergency medicine and aided in numerous disaster relief efforts domestically and internationally
- Managed a team of five to deliver medical care and treatment to hundreds of soldiers preparing for deployment
- Deployed in Operation Enduring Freedom: January 2013 – October 2013
- Awarded Meritorious Service Medal for learning the most Modern Standard Arabic in my unit and developing critical rapport with national Jordanian soldiers to gain needed cultural awareness
- Medically treated over 300 soldiers in war time scenario
- Managed and trained over 500 nationals and interpreters in Combat Lifesaver Course as well as those with language barriers prior to being deployed to Afghanistan
