## ABOUT ME

I became aware of programming at a young age as my dad has been a programmer since the '80s. However, it wasn't until I took an online course that I realized programming was something that I could really enjoy doing as a career. I love working in teams and solving problems to achieve goals, which is another reason I enjoy coding.

## MTB CONNECT

- Web Application that allows users to search mountain bike trails by zip code and build a network of mountain biking friends that ride similar trails.
- I built this front-end app in three weeks using React.js with React State and React Hooks for displaying data and handling the user interface. CSS and Material UI for styling. As well as JSON Server with fetch requests for data storage and manipulation.
- <https://github.com/tyler-simeone/MTB-Connect>

## EDUCATION

### Nashville Software School

Full-stack Web Development

### Columbia State Community College

AS

## SOFTWARE EXPERIENCE

### Full-Stack Software Developer

#### Nashville Software School

AUG 2019 - PRESENT

*Intensive full-time, full-stack software development course with an emphasis on individual and team-based projects.*

*Three months of remote learning and group project experience.*

## TECH STACK:

- Built single page web applications using JavaScript, React, HTML and CSS
- Utilized Git and GitHub for version control and issue tracking
- Utilized React State, Hooks, and Props to render data to the page and handle the user interface
- Utilized RESTful API architecture for all applications built

### REACT NUTSHELL - (Group Project)

- Built app with a team of three
- Multi-functional site that includes news articles, local events, restaurants, and task lists
- I built the task components that allow the user to perform CRUD operations on their task list using React.js, JSON Server, Reactstrap, and GitHub
- <https://github.com/nss-day-cohort-38/react-nutshell-pyroclastic-thunder-nerds>

## WORK EXPERIENCE

### Franklin Water Store - Sales Associate

JUL 2018 - JUL 2019

*Small business focused on producing and selling alkaline drinking water*

- Worked with a small team to inform customers about the benefits of alkaline water and water ionizing machines

### Delivery Dudes - Delivery Driver

APR 2015 - MAY 2018

- Worked at the DD headquarters where I used a web application to fulfill online and phone orders
- Delivery driver where I was responsible for constant communication with the HQ, inspecting customer orders from restaurants, and executing a timely delivery
