

JOSEPH "MIKE" PRINCE

Software Engineer

PERSONAL PROFILE

After spending 10 years as a helicopter mechanic in Special Operations Aviation, I was looking for a career change. A logic and design college course introduced me to the Python language, and after learning the basics, I developed a passion for software development.

DeVry University

Business Management
2016 - 2019

WORK EXPERIENCE

Full Stack Software Engineer

Nashville Software School | Jan 2020 - Present

Six-month full-stack web development boot camp with an emphasis on HTML, CSS, JavaScript and Python / Django

- Utilized Git/GitHub for version control and issue tracking
- HTML/CSS used to create simple web pages
- JavaScript used to build CRUD functionality in web applications
- Utilized React with hooks for functional component based web design
- Used dbdiagram.io to create entity relationship diagrams
- Utilized JSON to access and manipulate data from external and local APIs
- Utilized Agile SCRUM methodologies for project management
- Participated on development teams during sprints to deliver products on time

Special Operations Aviation

US Army | 2007 - 2018

- Managed 14 employees meeting production requirements in repair and maintenance of aircraft assigned to Special Operations Assault Helicopter Company
- Responsible for the training and certification of 14 employees on regularly updated inspection methods
- Conducted quality control, maintenance, and repair inspections for aircraft systems, resulting in zero incidents over a three-year period
- Managed daily production requirements for a powertrain shop while supervising and mentoring 14 employees
- Received jobs from Production Control Offices and various flight companies for assignment to available personnel
- Completed work orders, authorizations, and job related documentation
- Provided support for US Army programs including Sexual Harassment/Assault Response and Prevention, Equal Opportunity, and Equal Employment Opportunity
- Personally responsible for inspection and repair of \$300 million worth of parent organization's equipment
