### ABOUT ME

**Your not-so-average zoo  
keeper turned software  
developer.**

For the last 10 years, I've had the incredible opportunity to work up close and personal with a wide variety of animals. But as priorities in life change, so do careers. As a natural problem-solver with a keen eye for details - making the jump to software development wasn't as different from zoo keeping as you might think. Every day brings on new challenges and the idea of a lifetime of learning brings out an excitement in me that I look forward to continue exploring.

### EDUCATION

**NASHVILLE SOFTWARE  
SCHOOL, 2020**  
Full-Stack Software  
Development Bootcamp

**TOWSON UNIVERSITY, 2012**  
BS Animal Behavior,  
BS Psychology

## TECHNICAL EXPERIENCE

### Full-Stack Software Developer

**Nashville Software School (Jan 2020 - Present)**

Intensive, 6-month full-time software development bootcamp focusing on full-stack development fundamentals and problem solving through building individual and group projects utilizing HTML5, CSS3, JavaScript, React.js, SQLite3, Python, and Django

- Utilized Git and GitHub for version control
- Created ERD's to determine database dependencies
- Learned JavaScript fundamentals leveraging DRY, modular & readable code and reusable components
- Created websites and one-page applications using HTML, CSS, JavaScript, and React.js utilizing JSON server to access and manipulate data from external and local APIs
- Implemented full CRUD functionality triggered by user actions
- Built command line applications in Python & full-stack applications with Django & React
- Queried databases using SQLite and ORM
- Utilized tools including Visual Studio Code, TablePlus, and Postman
- Gained experience learning and working on individual & group projects remotely

## INDIVIDUAL PROJECTS

### BetaData

<https://github.com/alyssanycum/betadata>

- When it comes to climbing in an indoor rock climbing gym, climbs are constantly changing, and it can be difficult to keep track of which climbs you've already climbed. BetaData allows users to record the climbs they've done as well as any climbing goals they have. Users have full CRUD functionality on the climbs they record and can also add multiple attempts to a climb, add a helpful note about the climb, give each climb an enjoyment rating, filter & sort their climbs in multiple ways, and view charts that display how many climbs of each level they have done.
- Tech Stack: HTML5, CSS3, React.js, ReactStrap, Moment.js, Chart.js

## GROUP PROJECTS

### Bangazon Workforce Management

<https://github.com/alyssanycum/bangazon-workforce-management-aquarii-star-system>

- A full-stack web application for the HR department of Bangazon, LLC to manage their employees, departments, computers, and training programs.
- I was responsible for coding the nav bar and the list, detail, & form views & templates for departments. We initially populated the data in our database using model migrations and fixtures. We then queried the data using SQLite, converted that data into class instances, and then rendered those classes with Django templates. We also implemented CRUD functionality and utilized Django's built-in user authentication.
- Tech Stack: Python, Django, SQLite

## OTHER EXPERIENCE

### Hoofstock Keeper

**Nashville Zoo (Jun 2018 - December 2019)**

- Worked with multiple teams to ensure the highest standard of animal care
- Utilized problem-solving skills and attention to detail to make animal management decisions
- Educated the public about animal care and conservation through keeper talks, behind the scenes tours, and training demos
- Expanded training programs by establishing multiple new behaviors for primary animals to increase cooperation and safety during routine veterinary check-ups and procedures
- Revamped enrichment programs by submitting new items for approval and observing the animals with the items for success and safety
- Furthered my professional development by obtaining a certification from the National Association for Interpretation as a Certified Interpretive Guide in November 2018

## OTHER EXPERIENCE CONTINUED

### Driver Growth Operations Associate

Lyft (Jan 2017 - Jun 2018)

- Utilized internal tools to take prospective drivers from application to their first passenger
- Conducted quality assurance, provided coaching to local teams and partner sites, and built out training decks for Tier 1 Support
- Created project proposals for areas of Lyft's processes that needed improvement and presented proposals to stakeholders
- Learned basic SQL to query data used to implement and make improvements to the driver application process
- Conducted A/B tests to collect and analyze data to determine the success of proposed ideas of improvement

### Front Desk Manager

Climb Nashville (Feb 2016 - Dec 2016)

- Built relationships with members & guests by exchanging knowledge & experience about rock climbing
- Managed employees and the flow of the daily schedule to ensure a safe and fun environment
- Used Rock Gym Pro software to add & edit member & guest information and to inventory all food, gear, & facility supplies
- Listened intently to members & guests in order to match them with the membership and gear that best fit their individual needs
- Documented any incidents or injuries in reports and participated in meetings with management to share ideas of how to improve gym safety

### Summer Camp Coordinator

Nashville Zoo (Feb 2016 - Aug 2016)

- Managed summer camp staff and all aspects of summer camp including lessons, crafts, games, etc.
- Developed age-appropriate curriculum for multiple camps spanning ages 4-14
- Utilized Excel to organize camper registration information and create weekly rosters
- Presented exciting up close animal encounter presentations by using proper animal handling techniques and various interpretation styles
- Conducted evaluations on curriculum through surveys to assess the impact of the conservation messages that were taught
- Won 1st place in the Nashville Scene's 2016 Best of Nashville contest for best summer camp.

## PRESENTATIONS & RESEARCH

- Along with two fellow Hoofstock Keepers at the Nashville Zoo, I conducted a survey about giraffe and okapi husbandry practices across zoos worldwide and presented the results at the 2019 International Giraffid Conference at the Columbus Zoo.
- I had a poster displayed at the American Association of Zoo Keeper's National Chapter's 2015 Regional Symposium on the progress I made in establishing target training and desensitization training with the arapaima in the Smithsonian National Zoo's Amazonia exhibit.
- In 2013, I traveled to Karongwe Game Reserve in South Africa for a volunteer abroad program through GVI. I assisted with their reserve management by using telemetry to track implanted animals to collect data on the animal's location, behavior, full rating, and prey preference.
- In 2010, I traveled to the Amazon Rainforest in Peru for a Tropical Field Ecology course through Towson University where I conducted my own research project at Cocha Cashu Biological Station. I surveyed the bird species on both Cocha Cashu Lake and the Manu River to see if there was a significant difference in which species used which body of water and what they were using it for. I conducted statistical analysis using SPSS and wrote my findings in a research paper.
