ABOUT

In my work from design to code, I attempt to strike an elegant balance of form and function, a combination of creativity and logic. Within coding, I have found the freedom to explore with minimal resources. Consistent growth and enjoyment are essentially what I search for in my pursuits, and I have been able to find both in code.

CAPSTONES

T.H.E.R.E.: The Hottest Electronic Rave Experience

As an EDM (electronic dance music) fan and fest attendee, I felt the pain of having only my unreliable memory to keep track of who I planned to see at each fest while traversing many apps to find their respective lineups. My app allows users to find lineups in a single place, to save fests they are attending and to plan which artists they want to see at each of those fests in order to ease fest day planning.

TECH: *CSS, Figma, JSON Server, Lodash, Moment, React (Hooks), Tachyons*

SKILLCHILL

As a lifelong student, I have found a need for an appropriate forum to track my progression on the skills I choose to pursue. My app allows users to keep a journal of all their skills in a single app and receive feedback from others working on the same skills.

TECH: *CSS, Figma, Django REST, Lodash, Moment, React (Hooks), Tachyons*

SKILLS

DEVELOPMENT: *Chrome DevTools, CSS, Django (REST), Git, Github, Javascript, JSON Server, Netlify, Python, React (Hooks), SQL*

DESIGN: *AutoCAD, Illustrator, InDesign, Figma, Lightroom, Photoshop, Revit, Rhino*

LANGUAGES

ENGLISH: *Fluent (native)*
VIETNAMESE: *Fluent (native)*
SPANISH: *Working Knowledge*

EDUCATION

NASHVILLE SOFTWARE SCHOOL
September 2019–March 2020

UNIVERSITY OF TENNESSEE
August 2010–May 2015
Bachelor of Science in Interior Design

PROFESSIONAL

NASHVILLE SOFTWARE SCHOOL Nashville, TN
September 2019–March 2020

Software developer

- Collaborated with teams simulating Agile company environment utilizing Scrum + Kanban methods
- Used Git + GitHub for source code version control
- Designed applications through whiteboarding, creating ERDs and building HD mockups in Figma
- Built CRUD applications with HTML, CSS, Javascript, React, Python, Django + Django REST
- Pulled data from external APIs + mock REST API
- Used SQL to store + access data in relational databases
- Team project: React/Elixir app at Hackoween

CHINGU Remote

May 2019–July 2019

Software developer

- Pair-programmed coding challenges with a remote developer
- Solo project: Connect 4 game using React
- Team project: Artist retail store using React
- Deployed apps with Netlify

FREELANCE Remote

November 2016–February 2017

Graphic web designer

- Developed branding
- Designed graphics using Adobe Suite
- Designed Squarespace sites
- Created client walkthroughs using Loom

BLUR WORKSHOP Atlanta, GA

November 2016–February 2017

Junior Interior Designer

- Managed project communications
- Created architectural drawings with Revit, Autocad
- 3d modeled using Revit + Rhino
- Made FF&E selections, specifications + budgets
- Created design presentations in Powerpoint

FOREIGN LANGUAGE ACADEMY Knoxville, TN

January 2013–June 2015

Vietnamese-English translator

- Translated at schools, hospitals + court

UNIVERSITY OF TENNESSEE Knoxville, TN

January 2015–May 2015

Teaching assistant

- Mentored students during studio classtime
- Checked + graded student work

ZGF ARCHITECTS LLP Los Angeles, CA

May 2014–August 2014

Intern

- Made FF&E selections + specifications
- Created architectural drawings with Revit

ALLGIFTS.IE Dublin, Ireland

Summer 2013

UTK-credited graphic design internship
