PROJECTS

Participate

Front-end Capstone

Summary: A civil participation platform where people can educate themselves on their local governments. Users utilize an interactive map system to locate their government of choice. While browsing, they can add information to their dashboard.

Tools Used: HTML, CSS, Javascript, React, SemanticUI, ReactStrap, Parse Server, Back4App, JSON.

Handy-Andy (Nutshell)

Front-end Group Project

Summary: Worked with team to build a social-networking platform.

Responsibilities: Created the home page animation, built the task bar, and the messaging page.

Tools Used: HTML, CSS, Javascript, React, SemanticUI, Heroku, Netlify

Keahua Arboretum

Python Command Line App

Summary: A group project where we built a tool to help operate a simulated arboretum. Used class, inheritance, and duck-typing based interfaces to represent plants, animals, and biomes.

Tools Used: Python

ABOUT ME

Hello, I am Jeremy and I am here to help! I love helping people and solving problems; whether it is by creating things or fixing things. I am an ardent generalist who has found software development to be the perfect medium for both channeling my passions and utilizing my aptitudes.

SKILLS

- Exceptional communication and networking skills
- Successful working in a team environment, as well as independently
- The ability to work under pressure and multi-task
- The ability to follow instructions and deliver quality results

TECH EXPERIENCE

Nashville Software School

Full-stack Software Developer

JAN 2020 - PRESENT

Summary: Intensive full-time software development bootcamp focusing on full stack development fundamentals and problem solving.

- Source code version control with Git/GitHub
- Project management/tracking with Github Projects & Issue Tracking
- Application planning through white boarding dependency trees and building ERD's
- Built browser-based single page applications using React, HTML, CSS, JavaScript, JSON, and Parse Server
- Styled applications with CSS Frameworks ReactStrap, SemanticUI, and custom CSS
- Deployed applications through Heroku and Netlify.
- Created and modified database design/content using Parse Server and Back4App.
- Building command-line applications and SQL Database interactions with Python
