👤 PROFILE

Fun enthusiast , nature lover, and lifter of heavy things. Proficient in Python and JavaScript. Current student at Nashville Software School. Everyday is filled with problem solving, learning, frustration, the satisfaction of creation, and I absolutely love it!

⭐ INDIVIDUAL PROJECTS

INSTANT POT RECIPE SPOT - REACT

- Inspired by a love of quick cooking, and an annoyance of searching the endless void of the web for a decent recipe, Instant Pot Recipe Spot is a single-page application that allows recipe lovers to create new recipes, search for recipes, and add recipes to their own personalized favorites page. Front-End Capstone project built in React.js with JSON server for persistent data storage and Material-UI for styling.

Nutshell - JavaScript

- Nutshell is a a dashboard for people to use to organize their daily tasks, events, news article, friends, and chat messages.
- Front-End group project built with HTML,CSS and JavaScript with JSON server for persistent data storage and Material-UI for styling.
- Implemented the Messages component which allows users to send messages in a group chat, also worked on user registration.

🎓 EDUCATION

Nashville Software School

Full Stack Software Developer 2020

Baton Rouge Community College

2010-2012

🏢 EXPERIENCE

NASHVILLE SOFTWARE SCHOOL
FULL STACK DEVELOPER | Jan 2020 - Present
Itntensive six-month full-stack software development bootcamp
- Built browser-based, full-stack applications using HTML5, CSS3/Material-UI, JavaScript, React.js, SQL and Python/Django anchoring learning with both individual and team-based projects.
- Utilized GitHub for source version control and collaboration
- Used Agile and Scrum methodology to help teams focus on the current sprint's objectives and increase productivity.

GROUP PROJECTS
Nutshell - React - https://bit.ly/3cgSJ8p
- Worked with 3 others to develop a simple social media app that allows users to keep track of important events, tasks, and interesting news articles, as well as share public messages with other users.
- CRUD application using React.js and JSON server for persistent data storage.
- Implemented the Events component which allows a user to enter in an event that will happen at a future date, show when that event is next on the agenda, and make the most recent event more prominent in the application.

LOWE'S HOME IMPROVEMENT STORES

DELIVERY DRIVER | 2017-2019
- Ensured on-time, accurate, safe deliveries, and installations while providing exceptional service to customers in their homes.
- Built positive relationships with customers every day and ensured their needs were met.

JUSTIN PAUL FINANCE
